
ABDUS-SALAAM ABDUL-ABDUL-QAYYUM |

.NET Backend Engineer | ASP.NET CORE SPECIALIST | Backend Software Engineer

Lagos State, Nigeria | +2349138888736 | pakorichie@gmail.com | GitHub:
<https://github.com/Olawale-15>

PROFESSIONAL SUMMARY

Results-driven .NET Backend Engineer with 5 years of experience designing scalable REST APIs, microservices, and distributed backend systems using C#, ASP.NET Core, Kafka, and SQL technologies. Skilled in Clean Architecture, CQRS, domain-driven design, and performance optimization. Proven record improving system efficiency, reducing response times, and delivering secure cloud-ready applications.

CORE COMPETENCIES

- ✓ Languages & Frameworks: C#, SQL
- ✓ Backend: ASP.NET Core, Web API, MVC, Entity Framework Core
- ✓ Architecture: Microservices, Clean Architecture, DDD, CQRS, SOLID
- ✓ Security: ASP.NET Core Identity, JWT Authentication, Cookies and Session
- ✓ Messaging: HTML, CSS, Bootstrap, JavaScript, Tailwind CSS
- ✓ Databases: SQL Server, PostgreSQL, MySQL
- ✓ Tools: Swagger, Postman, Visual Studio, Visual Studio Code, GitHub

PROFESSIONAL EXPERIENCE

Full Stack Developer

Cloudware Ltd | Feb 2025 – Present

- Develop and maintain enterprise applications using Angular and ASP.NET Core.
- Build and consume RESTful APIs for scalable frontend-backend integration.
- Implement backend services, authentication flows, and business logic using .NET technologies.
- Contribute to feature delivery, bug fixes, performance optimization, and production support.
- Collaborate across teams to deliver maintainable, scalable software solutions.

Tech: Angular, TypeScript, ASP.NET Core, C#, SQL Server, Git, Docker

.NET Developer (Contract)

Fyndah | Jan 2023 – Mar 2023

- Sole developer responsible for maintaining and scaling microservices for SaaS ERP platform.
- Implemented Kafka-based inter-service messaging for asynchronous communication.
- Developed supplier and vendor modules that improved workflow efficiency by 25%.
- Built appointment scheduling features with real-time synchronization across services.

Tech: ASP.NET Core, Kafka, Microservices, PostgreSQL

.Net FullStack Developer

Jimax Solution | March 2023 - October 2024

- Engineered enterprise-grade web applications using ASP.NET Core Web API and Razor Pages.
- Built secure RESTful APIs integrated with payment gateways and JWT authentication.
- Refactored monolithic modules into modular services using Clean Architecture and DDD principles.
- Optimized EF Core and LINQ queries, reducing API response time by 30%.
- Improved maintainability and scalability through modular architecture patterns.

Tech: ASP.NET Core, EF Core, SQL Server, JWT, Docker

Software Developer Intern

Internship | Sept 2021 – Feb 2022

- Contributed to internal business tools using ASP.NET Core MVC.
- Participated in peer code reviews and pair programming.
- Built foundation in backend APIs, database design, and software architecture.

RELEVANT PROJECTS

Distributed Order Management System

Designed event-driven microservices for orders, payments and inventory.

- Designed event-driven microservices for orders, payments and inventory.
- Implemented CQRS workflows improving throughput by 40%.
- Containerized services with Docker and deployed to Azure.
- Applied database optimization and asynchronous processing for scalability.

Hostel Management System

ASP.NET Core Web API | Paystack

- Built backend APIs for hostel listings, booking and rent payments.
- Integrated Paystack for payment automation.
- Designed secure user and landlord management workflows.

Online Bookstore

ASP.NET Core | JWT Authentication

- Developed role-based backend system for admin and customer management.
- Implemented secure authentication and authorization.
- Built CRUD APIs for book inventory and orders.

EDUCATION

B.Tech Computer Science

Ladoke Akintola University of Technology

Graduated: 2025
